

Quality Assurance Manager

Location: Merelbeke, Belgium

Job description

Ziphilus is a pharmaceutical company that focusses on the development of RNA-based vaccines, and therapeutics. As a QA Manager, you will be working in a young and dynamic environment where collaboration and teamwork are encouraged.

You will be responsible for:

- Supporting continuous improvements in the electronic Quality Management System (eQMS)
- Facilitating the process of creating, reviewing, and archiving Standard Operating Procedures (SOPs), Batch Records, Work Instructions, Protocols, Reports, etc
- Organize QA related training to the team
- Ensuring current versions of controlled documents are readily available to site personnel
- Providing support in the establishment and maintenance of a work environment with a focus on quality that fosters learning, respect, open communication, collaboration, integration, and teamwork
- Assisting in the follow up of events and CAPAs
- Working collaboratively with the Research, Development, and CMC Department.
- Proactively identifying risks within the QMS and supporting the development of action plans to address and drive continuous improvement

Preferred qualifications

- A master's degree in pharmacy, biomedical sciences, or any other scientific degree that allows you to fulfill the above-mentioned tasks
- A minimum of 2-3 years QA experience within a pharmaceutical/biotech environment is required
- Willingness to learn is a must
- Strong administrative skills, and the ability to generate clear, concise reports
- Experience with QA at the interface of R&D and GMP is a plus
- Ability to prioritize work, take initiative when required and to work quickly and accurately
- Clear communication skills
- Fluent in English, both written and verbally
- Great interpersonal skills, a team player, but equally comfortable working independently
- Ability to work in a fast-paced, small company environment.
- Experience with Master Control is a plus
